Create your Azure free account

An Azure free account gives you access to explore capabilities and develop proofs of concept. Your account also includes:

USD200 credit to use in your first 30 days

Free monthly amounts of 20+ popular services for 12 months

Free monthly amounts of 65+ always-free services

Spending protection—your credit card won't be automatically charged until you move to pay-as-you-go pricing

Step 2 of 3

I understand that Microsoft may contact me about my free account.

☐ I represent that I am the individual identified on this account. I agree to the terms and conditions of the [Microsoft Customer Agreement](#) including the Supplemental Individual User Terms.

I will receive information, tips, and offers about Azure and other Microsoft products and services.

☐ I would like Microsoft to share my information with select partners so I can receive relevant information about their products and services.

DEF

Let's start building, Bhargavi

Start with a template

Deploy in minutes using pre-made templates.

Import code from GitHub

Connect your GitHub account and deploy existing repositories.

Welcome to Azure

Create your first AI agent, import code from GitHub, or choose a template or service to get started. Includes \$200 in free credits to build, test, and deploy your project.

Close

Continue

- Note : **INR ₹2** will be deducted from your **Credit or Debit Card**, during subscription. It's mandatory for validation of **Azure Account**.
- Initially you will not be able to deploy artefacts & won't be able to create build or release pipelines. You will need to disable some settings.

After the account creation, you will need to navigate to the home page : <https://portal.azure.com/#home>

- On the search bar 🔍 type " **Azure DevOps Organizations** " to go to the " **My Azure DevOps Organizations** " page as shown below & click on the link at the bottom left hand corner as shown.

- Once you have created the account, create a new organisation by clicking one the **New Organisation Link** as shown below on the left hand side of the screenshot.
- Once created, you will need to remember the **Organization Name** or save it somewhere because it will be needed during **parallelism sign-up** for Microsoft. This helps in creating **agents** & also services like **web, db**, etc. You can see that the organisation name in our case is : <https://dev.azure.com/130472/>
- Initially there will be no projects under your Organisation. You can similarly create a **New Project** by clicking on the **New Project** link on the right hand side of the page as shown below on the screenshot.
- Once created, all the **Projects** will reflect on the webpage as shown below in the snippets/screenshots eg **DemoProject**.
